

March 2017

Elementary and Middle School

Breakfast \$1.50
Lunch \$2.50
Milk \$.40

Breakfast Options Daily:
Yogurt, Cereal, Bagel, or
Muffin with Fruit and Milk

This is a perennial thistle that originated in the Mediterranean. It is technically a flower bud that has not yet bloomed. It was brought to the United States in the 19th century by French and Spanish immigrants.

It is a rich source of dietary fibers, vitamins K, B9 and C and minerals such as sodium, manganese and magnesium.

It facilitates digestion and improves functions of liver and gall bladder. It can also prevent development of coronary disorders via reduction of blood cholesterol levels.

It cannot be consumed raw (it needs to be processed first) and it can be fried, grilled, baked, cooked or microwaved and used for the preparation of stews, soups, salads, sauces and casseroles.

This thistle is an **artichoke!** In fact the name artichoke is derived from the Turkish word for thistle.
